## Can Tweeters Spread The News?

Tweets may be one of the fastest ways to spread some news. In just a few words and the click of a button it is possible to reach out worldwide with information. The map in this box shows origin tweets in pink and retweets in green. Shown on the left is a map of tweets on Jan 12th 2010, most of which geolocated to Haiti based on the fact that they were about Haiti. Also shown below is a small sample of the many tweets in the database. A word cloud is a great way to show trends as well with repeat words given heirarchy in size over less common words. Japan's data is to the right.
